- CMS & API architecture
- DevOps-minded delivery
- Frontend coordination & mentoring
- Product-minded communication

LANGUAGES

Bulgarian Native
English Professional

AVAILABILITY:

Available for full-stack roles. EU remote or Sofia hybrid/on-site.

PROFILE

Full-stack developer at **Industria Technology** in Sofia — from business analysis into software delivery on the same team. I work with Angular, Vue, and Strapi across frontend, content systems, and APIs, with PostgreSQL and MongoDB in production-shaped stacks. I also contribute to DevOps workflows, security-minded server practices, and frontend mentoring.

EXPERIENCE

Full-Stack Developer · Industria Technology

2025 — PRESENT · SOFIA

- Deliver advanced Angular, Vue, and Strapi solutions across UI, CMS architecture, and backend integration.
- Work with PostgreSQL and MongoDB in API and content-driven systems.
- Support DevOps workflows, firewalls, and security practices so releases stay predictable.
- Coordinate frontend developers and help the team ship with consistent quality.
- Same team progression:
 - Business Analyst Intern (7 months): user stories, process analysis, and agile sprint planning — integrated into full-stack delivery at Industria.

Earlier roles

2021 — 2024

Auto mechanic and florist — customer communication, diagnostics, organization, and ownership under real-world pressure.

SELECTED PRODUCTS

Personal projects — both built independently in my free time, outside my day-to-day role at Industria Technology.

HOW I WORK

Clear trade-offs, readable delivery, and communication that helps teams move — from product framing to shipped code.
